

Building Blocks Snap!

You will need:

- A pile of bricks
- A box or container for each player

How to play:

- Make sure every player has the same pieces in their box or container, (eg a blue 4x2 and a red 8x1)
- You will need at least 10 pieces each.
- On the count of 3, each player takes a piece out of their box at the same time, putting them on the floor or table so everyone else can see.
- If there are two matching pieces, the first player to shout 'snap' gets to keep all of them.
- Keep playing until all of the pieces have been won or there are odd ones left.
- Build a model with all of your winning pieces. What can you create?
