

## Create Together

### You will need:

- A pile of bricks
- 'Team Speak' cards

### How to play:

- Sometimes it's good to design and build alone.
- Sometimes, if we design and build with others we can swap ideas and create even better models.
- It is not always easy building with someone else. It can sometimes be frustrating and being able to communicate well is really important in team work.
- It is ok to agree and disagree with your team members. It is important to be careful how we do this and try to be respectful.
- Design and build a model with someone else and use the Team Speak cards to help you talk together to build the ultimate model.
- Don't forget to show off your creation to friends and family.

**“It might be a good idea if.....”**

**“I don’t like that idea as much as this one.”**

**“What do you think about.....”**

**“What a brilliant idea, nice one!”**

**“I’d like to do this, what do you think?”**

**“I understand what you’re saying but prefer it this way.”**

**“I’m impressed with that.”**

**“Maybe we can find a way to include both our ideas.”**

**“I like the way you have.....”**

**“Shall we take a break and come back to it later?”**
