

## Listen and Build

### You will need:

- A pile of Building Blocks
- Listen and Build cards

### How to play:

1. Put the pile of bricks in the middle.
2. Player 1 reads out the instructions on the first card.
3. Other players collect the pieces they need and build their model.
4. Once built, read out the 'Listen and Build' card again and each player checks their model to make sure the instructions have been followed. Players can correct their model if needed.
5. Player 2 picks a card and players listen and build the next model.

### Want to make it harder?

- \* Add a timer to the build - can you complete it in 30 seconds?
- \* Who can be the quickest and most accurate?

**Listen and Build**
