

## **Persuade Me With Pieces - Island Rescue!**

### **You will need:**

- **A pile of bricks and other pieces**
- **Paper and pens**

### **How to play:**

#### **Here is the dilemma:**

***Your friends have been stuck on an island surrounded by shark-infested waters and need help to get home safely. You must help them by designing and building a solution. (It doesn't have to be a boat). They have some drinking water but are quickly running out and they need some shade to protect them from the sun.***

- **Think about ways to get your friends to safety.**
- **Design and build a solution. Can you add some features that will solve their problem with their water and the sun?**
- **Present it to family or friends and convince them you have made the ultimate build to solve the problem!**
