

Totem Pole Me!

Construct a Totem Pole based on your life. It could be milestones you made each year since you were born. It could be achievements you have made.

First, it may be helpful to find out about Totem Poles. The internet is a good place for this and will help you with your research skills.

When you know more about them, it will help you decide what things you want to add to each layer of your Totem Pole. Add as many layers as you want.

Examples –

1. I was born
 2. I went on my first camping trip
 3. I had my first birthday party.
 4. I learned to swim.
 5. We moved to a new house.
-
1. I scored my first goal in football.
 2. I created a great online game.
 3. I caught my biggest fish.

4. I bought my first Xbox out of my own money.
5. I died my hair purple for charity.

You can create your Totem Pole with construction, such as building blocks. The layers could be different colours. Or you could construct actual models and either lay them flat on a board or build them on top of each other.

You could use the centre of kitchen rolls and paint shapes and symbols for each layer. Or even find a branch from a tree.

You could create a collage Totem Pole on a large piece of cardboard, using lots of different textures and materials.

Do not forget to record what each layer was about so that other people can read your Totem Pole story.

Get creative! Have fun!

Remember, this is all about *you*!
